

Fostering Development of Construction Industry in IDB Member Countries

This seminar will look at ways to enhance the capacity of businesses in IDB member countries and increase the transparency of procurement processes. The objective is to optimize the effect of IDB-financed construction initiatives. IDB provides extensive support to infrastructure development in member countries.

The theme of this seminar is directly linked to a large proportion of IDB's portfolio and affects the Bank's efforts to alleviate poverty and support sustainable growth. Infrastructure initiatives are a driver of economic growth in many member countries. These countries will benefit from the enhanced procurement procedures that will be discussed at the seminar.
