

Supporting Smart, High and Inclusive Growth in Indonesia

Since its inception, the IDB Group has been supporting the Government of Indonesia's development plans. With the launch of the first IDB Group Member Country Partnership Strategy (MCPS), 2011-2014, and the second MCPS, 2016-2020, the main theme of IDB's development assistance has been Supporting Smart, High and Inclusive Growth in Indonesia.

This seminar will explain how the IDB Group has been supporting Indonesia and other member countries to achieve smart, high and inclusive growth. It will showcase and discuss Indonesia's growth model and policies. It will also emphasize the importance for the IDB Group and other development partners to implement these strategies to support member countries through collaborative activities. Policymakers, together with representatives from the private sector, academia and the donor community, will participate in the discussions.
